

Niklas Blomqvist, Philip Johansson, Matteus Laurent, Johan Levinsson,
Oscar Petersson, Erik Peyronsson

MatLabb - Design Specification

Högskoleingenjörsutbildning i datateknik, 180 hp

Design Specification - September 27, 2015
System Design - Project, HT15
TSIU03, Linköpings universitet

Supervisor:
Petter Källström
Department of Electrical Engineering (ISY)

Introduction

Introduction (1/2 page)

The entire Design Spec should be 5-7 pages

System Level Description

System Level Description (Block diagram + description of 1 to 2 pages).

(Make sure that your description justifies how the Requirements of your system are met, especially those that are not obvious.)

Challenges in the Design and Proposed Approach

Challenges in the Design and Proposed Approach (Main 2 or 3 challenges and proposed solutions, 1/2 to 1 page per challenge).

User Interface

User Interface (How to control the system + image visualized on the screen).
